Code

```
def f(x, m):  
    return "Hello, function!"
```

The diagram consists of two dashed blue arrows pointing from the function call `f(x, m)` to the function definition `def f(x, m):`. The first arrow originates from the argument `x` and points to the parameter `x` in the definition, with the label "Input" written above it. The second arrow originates from the argument `m` and points to the parameter `m` in the definition, with the label "Model" written above it.

```
def f(x, m):  
    return m[0] * x + m[1];
```
